

# Infinite Scrolls

Hello and thanks for purchasing the Infinite Scrolls asset!

You can chose any of the 3 premade items examples or create new with no necessity of write a line of code. The demo scene show you how can work the asset in your game.

If you want, you can read this tutorial. It covers how set easily a credits as example in seconds:

## Step 1:

Drag and drop the prefab ***InfinityScrollCanvas (InfinityScroll>Prefabs)*** in the scene.

## Step 2:

Add or modify new items.

If you want you can modify the scroll:

### Variables:

**Margin Items:** Distance between items.

**Start Time:** Start time, when startTime = 0 start to move the scroll in up direction.

**Scroll Speed:** Constant speed to move the scroll.

**Drag Force:** Drag force to move the scroll up or down.

## Step 3.

Enjoy.

I hope you enjoy this asset and if you create cool stuff with it, please send me a link to your game!

If you have any issues or question then please don't hesitate to contact us:
